

## ACMESIL3636 36oz Silica Cloth

**ACMESIL36 ANSI/FM4950 APPROVED**

### Description:

Acmetex ACMESIL3636 is a silica cloth with a silica content upward of 96%, resulting in excellent break strength and improved abrasion resistance. Made from woven silica fibers, it is known for its exceptional heat resistance, excellent insulation properties, and high strength-to-weight ratio. Silica cloth is used in a wide range of industrial applications where high-temperature resistance is required. This high silica cloth has been specially developed for use in extreme temperature environments.

### Advantages:

- Extreme heat resistance
- Insulation properties
- High strength-to-weight ratio
- Chemical resistance
- Flexible
- Non-combustible
- Electrical insulator

### Applications:

- Welding blankets/curtains
- Fire blankets
- Heat and flange shielding
- Gaskets and seals
- Hose/cable protection
- Stress relief
- Protective garments

### Property Data ACMESIL3636

Weave construction	12 Harness Satin
Silicon dioxide content	≥96%
Tensile strength	Warp: 220lbs/inch Fill: 160lbs/inch
Color	Caramel
Weight	36oz/yd <sup>2</sup>
Thickness	0.055"
Temperature resistance	Continuous use: 1800°F (982°C) Melting point: 3000°F (1649°C)
Size	36", 60" * 50 yards
